

ABHAY NARAYAN SINGH

Software Developer • Python • Java • C++ • Data Structures & Algorithms

kmrsing116@gmail.com | +91 63785 08254 | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Computer Science undergraduate with a strong foundation in Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, and Database Management Systems, and proficiency in Python, Java, and C++. Currently interning as an AI/ML Intern at AlforAll Global, building a RAG-based loan document chat analyser using vector databases. Skilled at problem solving and complexity analysis, with hands-on software development experience gained through self-driven full stack projects using React.js, Node.js, Express.js, and MongoDB. Strong analytical thinking, communication, and collaboration abilities developed through academic teamwork, with a proven ability to adapt quickly in ambiguous, fast-paced environments. Seeking a Software Engineer role to apply core CS fundamentals and problem-solving skills on real-world systems.

TECHNICAL SKILLS

Programming Languages: Python, Java, C++, C, JavaScript

CS Fundamentals: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Database Management Systems, Complexity Analysis (Big-O)

Web Development: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, REST API Development

AI/ML: RAG Pipelines, Vector Databases, LLM-based Chat Applications

Databases: MongoDB, SQL & Relational Databases

Tools & Practices: Git, GitHub, Online Collaboration

Core Strengths: Problem Solving, Analytical Thinking, Communication & Collaboration, Adaptability in Fast-Paced Environments

PROJECTS

MailPilot – AI Email Marketing & Campaign Automation Platform

React (Vite) • Node.js • Express.js • Tailwind CSS • Recharts • Axios | [GitHub](#)

- Built an enterprise-style email marketing SaaS platform featuring campaign management, a visual HTML template builder, subscriber/contact management, and real-time analytics.
- Structured the app with a feature-based architecture (auth, dashboard, campaigns, templates, contacts, analytics, settings) and React Router v7 with lazy-loaded routes.
- Implemented a Node.js/Express backend with an Axios-based service layer, and visualized open rates, click conversions, and bounce rates using Recharts.
- Added dark/light theme switching, a CSV-based bulk contact import flow, and deliverability settings for SPF/DKIM/DMARC configuration.

DocMind AI – AI-Powered Document Analysis & Chat App (In Progress)

React • Tailwind CSS • Vite | [GitHub](#)

- Developing an AI-powered application that lets users upload documents and interact with their content through a conversational chat interface.
- Set up the project foundation with React and Tailwind CSS on a Vite build pipeline, structured for scalable component-based development.

EXPERIENCE

AI/ML Intern — AlforAll Global | Netherlands (Remote)

AlforAll Global — non-profit advancing human-centred AI for sustainable development | [Website](#)

- Building an AI-powered loan document chat analyser using Retrieval-Augmented Generation (RAG) pipelines and a vector database, enabling users to query and understand loan documents through a conversational, ChatGPT-style chat interface.
- Working on the retrieval layer: embedding and indexing documents in a vector store, and designing prompts/context flow to return grounded, relevant answers.

EDUCATION

Parul University, Vadodara, India | 2023 – Present

- Undergraduate studies; engaged in coursework, classroom presentations, and collaborative group projects.

Maharishi Arvind Public School, Kota, Rajasthan | High School Diploma, 04/2022

Open to Software Developer / SDE roles • Available for immediate start
